In Progress

LANGUAGE

Greek - Native

English - Fluent (C2)

Full-Stack Engineer with 7+ years of experience building high-traffic, cloud-native web and mobile products in product-led environments.
Specialised in TypeScript, React/Next.js, and AWS serverless architectures, with strong experience in event-driven systems, payments, and SaaS platforms.
Product-minded engineer with end-to-end ownership across frontend, backend, and cloud infrastructure.

WORK EXPERIENCE

Full-Stack Engineer
Cloud Touchless Massage - NY, USA (Remote)   03/2024 – 01/2026
- Built a centralized AWS stack handling high-traffic, customer-facing workloads with 99.9% uptime.
- Developed a React Native iOS app deployed across 15 iPads, enabling real-time massage chair control and reducing staff workload by 80%.
- Created Next.js web app with Stripe integration, processing hundreds of payments daily for memberships and day passes.
- Improved system reliability with 60-second heartbeat checks, cutting downtime by 90%.
- Delivered full-stack platform uniting IoT control, customer apps, and cloud backend, supporting hundreds of weekly sessions.
- Designed and maintained event-driven, serverless services handling real-time and transactional workloads.

Full-Stack Engineer
Authoritive Inc. - New York, USA (Remote)   09/2020 – 02/2024
- Led the front-end for a microlearning SaaS used by 30+ authors to turn content into interactive programs.
- Built key React/Next.js features (drag-and-drop editor, checkout builder), cutting publishing time by 70%.
- Contributed to the AWS backend (Lambda, DynamoDB, S3, AppSync) with 99.9% uptime, powering thousands of daily deliveries.
- Implemented multi-channel delivery (SMS, WhatsApp, MS Teams), reaching 3,000+ active users.
- Collaborated in bi-weekly sprints, reducing release cycles by 40%.

Web Developer
Freelance - Larissa, Greece (Remote)   10/2015 – 09/2020
- Built & launched 10+ mobile-first responsive websites using the latest libraries and frameworks.
- Delivered on-time, in-scope projects for 10+ clients.
- Applied SEO best practices, boosting traffic by 30% in 3 months.
- Optimized performance, cutting load times by 40% and improving UX.
- Adopted modern frameworks, reducing dev time by 20%.
